

## Brand New Technology to Disintegrate all Data Bearing Media and Devices.

Seen here with the inventor, Christian Mesu, the MaxxE Safe will disintegrate hard disks, tapes (backup, CCTV, Surveillance, and Audio), Mobile phones, PDAs, CDs, and DVDs down to **1mm** if required. **It is virtually SILENT and only uses a standard 220-240V power source.**

It is totally mobile and is easily transportable. It will fit in most lifts for deployment into office blocks. Imagine being able to shred a disk in front of your customers eyes on the 26<sup>th</sup> floor!

Ultratec, a leading provider of CESG approved Data Erasure products & services have been appointed as the UK & Ireland distributor for the Maxx E Safe disintegrator.

- For security it reduces to 6, 3 and even 1 mm (almost "dust") particles.
- Virtually silent operation
- Reduces your current carbon footprint
- Top European build quality
- Patent Pending Cutting Mechanism
- Works in an office environment (13amp socket)
- Easily transportable by standard size van.
- Disintegrates from 30mm to 1mm
- Duty Cycle of 20 HDD/Hr. at 6MM.
- Easy & inexpensive Blade changes
- 1 Year manufacturers warranty (with service)
- Full service and support available
- Special build options available including: Photographic evidence, barcode recording,
- Increase security by destroying data on YOUR site
- Government Security Standard (IS5) compliant at 6mm particles.
- Full Project prices available ie a daily rate with engineer

For security information got to <http://www.eadms.org/home.html> change to English, then "publications". The European Association for Data Media Security (EA DMS) 2008 Standard is explained with useful photographs. Our disintegrator is the only machine fully compliant with this standard.

For further information regarding a demonstration and leasing and service options please call Bill Osborne on 01462 492348 or e-mail [Maxxe@ultratec.co.uk](mailto:Maxxe@ultratec.co.uk)
